Disaster Management for Water & Wastewater Utilities-MGT343

October 7th & 8th, 2013

This course provides training to Water and Wastewater professionals on the issues of preparing for, responding to, and recovering from incidents affecting water and/or wastewater facilities. This course covers the various natural and man-made (accidental or intentional) hazards to which water and wastewater systems may be vulnerable and the potential effects the hazards may induce. Legislation that serves to aid in the planning and response to a natural or man-made incident is discussed along with measures that can mitigate threats to the water and wastewater systems. Participants are guided through portions of the Environmental Protection Agencies Response Protocol Toolbox to identify steps in the response and recovery processes.
