June 10, 2008

Wyoming Water & Wastewater Utility Organizations:

The Wyoming Office of Homeland Security would like to commend the proactive stand you have taken regarding the Wyoming Water and Wastewater Mutual Aid and Assistance Agreement. This agreement goes a long way in preparedness, response and recovery efforts when a local community is faced with a major crisis causing damage to local waterworks infrastructure and threatening the health and safety of Wyoming citizens.

As you are aware, WYOWARN is a mutual assistance program consistent with other statewide mutual aid programs and consistent with the National Incident Management System (NIMS).

We encourage all local water utility systems to become active in this initiative as a means of sound preparedness in time of crisis.

Sincerely,

Joe Moore  
Director
